

Laura Graells

Program Manager · PMO & Governance · PMP, ITIL 4, ServiceNow CSA

laura@iaetica.cat · linkedin.com/in/lauragraells · lauragraells.github.io · Barcelona, Spain · remote across Europe

PROFILE

I have worked in healthcare, manufacturing, transport and international corporate environments. I set up a PMO from scratch, led the global rollout of ServiceNow across Europe, North America and APAC, and deployed MES and ERP systems in industrial and regulated settings. PMP, ITIL 4 and ServiceNow CSA certified; currently completing an MSc in Artificial Intelligence and working on the governance and compliance side: the EU AI Act and GDPR.

CORE COMPETENCIES

Program and portfolio management · PMO set-up and governance · Baseline control and variance analysis · Earned value management · Risk and dependency management · Stakeholder management across EU, NA and APAC · Vendor and contract management · ITSM and ITIL 4 · ServiceNow · Business process automation (BPM, MES, ERP) · Regulatory compliance (JCI, GDPR, EU AI Act) · Reporting, KPIs and dashboards · Agile and Scrum · Change management and training

PROFESSIONAL EXPERIENCE

Keywords Studios — Program Manager and ServiceNow Developer

August 2021 – present

international, remote · Global IT Program Manager (2021–2023) · ServiceNow Developer and Program Manager (2023–present)

- Led the global rollout of ServiceNow for IT Service Management across Europe, North America and APAC, managing stakeholders and delivery teams across non-overlapping time zones.
- Oversaw migration from legacy tools and standardised Incident, Problem, Change and Service Request management.
- Coordinated vendor engagement, system integration and training for end users and IT teams worldwide, with phased delivery and risk management.
- Established reporting frameworks and KPIs measuring adoption, service performance and business impact.
- Since 2023, platform development and automation: Flow Designer, Business Rules, UI Policies and Service Catalog, with ITSM workflow optimisation across Incident, Request and Change.
- Applied Predictive Intelligence to incident categorisation; evaluated Now Assist and AI Agents in a controlled environment. Work aligned with ITIL 4 practices.

IAètica — own initiative

2026 – present

Catalonia, Spain

- Small-scale work applying AI to administrative processes in small businesses: on-premise document extraction, contact tracking, and AI literacy material for EU AI Act Article 4.
- Ongoing: project tracking and governance for the engineering division of a services group – baselines, variance against baseline, earned value and a dated decision log, built on Excel and SharePoint.

Corporate IT Program / Project Manager — Agromillora Group

November 2019 – August 2021

Barcelona, Spain

- Led the deployment of Siemens SIMATIC IT MES to improve production control, traceability and operational efficiency.
- Adapted the MES to a demanding production profile: high cultivar variety and small lot sizes in plant nursery operations.
- Integrated MES with ERP and IT infrastructure to ensure consistent data flow, reporting and decision support.
- Coordinated international cross-functional teams and managed vendor relationships throughout the rollout.
- Delivered to schedule and budget using PMP methods; standardised processes across all subsidiaries.

Senior Project Manager — Grupo Julià

November 2016 – March 2018

Barcelona, Spain

- Managed a large-scale programme introducing technology-enabled transport for SEAT employee shuttle buses: 61 routes, three shifts daily, across the province of Barcelona.
- Implemented Frotcom fleet geolocation providing real-time visibility to both Grupo Julià and SEAT.
- Deployed on-board Wi-Fi and integrated employee time-tracking directly on the vehicles.
- Coordinated development of a mobile app for employees to track bus location and estimated arrival times.
- Reported KPIs and progress to senior management on both the client and provider side.

IT Project Manager — ANV

February 2015 – September 2016

Barcelona, Spain

- Established the Project Management Office within the IT department, introducing project governance and standardised practices.
- Defined methodologies and processes coordinating Infrastructure, Development and Document Management initiatives.
- Implemented portfolio tracking and reporting tools to improve visibility of progress and resource allocation.

Project Manager and Senior Business Analyst — Soler & Palau Ventilation Group

January 2012 – January 2015

Parets del Vallès, Spain

- Delivered multiple business process automation projects on Aura Portal BPM: requirements gathering, workflow design and implementation.
- Contributed to the analysis and deployment of Microsoft Dynamics ERP, coordinating multiple vendors and internal stakeholders.

Business Analyst — Centro Médico Teknon

June 2006 – January 2011

Barcelona, Spain

- Led key healthcare IT projects including the Clinical Case Management System and the digital Nursing Admission Procedure.
- Worked directly with the IT Director on strategic initiatives such as the reengineering of accounting and billing and the Oncology Institute workflows.
- Ensured solutions met the standards required to retain Joint Commission (JCI/JCAHO) accreditation, balancing operational efficiency with patient safety and compliance.

EDUCATION

MSc in Artificial Intelligence – Universidad Isabel I (2025–2026). Machine Learning, Deep Learning, Responsible and Ethical AI.

MSc in Industry 4.0 – UNIR (2020–2022). Electrical, electronic and communications engineering technology.

Master's in Project Management – La Salle BCN (2011–2012).

CERTIFICATIONS

PMP – Project Management Institute · ServiceNow Certified System Administrator (CSA) · ITIL 4 Foundation · Scrum Master – Scrum Alliance
